| Hyderabad    | 38           | 32         | 26         | 25         | 18         | 9         | 23.68%                  |
| Bangalore    | 81           | 63         | 54         | 47         | 34         | 15        | 18.52%                  |
| Mumbai       | 50           | 39         | 32         | 27         | 20         | 9         | 18.00%                  |
| Delhi        | 125          | 100        | 80         | 71         | 50         | 19        | 15.20%                  |
| Kolkata      | 27           | 24         | 17         | 17         | 10         | 4         | 14.81%                  |
| Gurugram     | 120          | 101        | 77         | 63         | 43         | 14        | 11.67%                  |
| Pune         | 60           | 48         | 36         | 32         | 15         | 5         | 8.33%                   |
| Ahmedabad    | 20           | 15         | 12         | 11         | 3          | 1         | 5.00%                   |
| Noida        | 29           | 23         | 19         | 17         | 11         | 1         | 3.45%                   |
| Chandigarh   | 9            | 7          | 6          | 5          | 1          |           |                         |
| <b>Total</b> | <b>559</b>   | <b>452</b> | <b>359</b> | <b>315</b> | <b>205</b> | <b>77</b> | <b>13.77%</b>           |

- **Average Time to Onboard**

- Students spend an average of ~23 days from Pre-Verified to Onboarding stage.
- Average time spend in funnel is quite high by industry standards.
- Needs process improvements to reduce overall time spent in the funnel.

# • Recommendations

- **Process Improvement Survey:** Conduct a comprehensive survey to identify bottlenecks in all stages of funnel. And Specifically inefficiencies in the Visited and Agreement stages.
- **Regional Demand Analysis:** Analyze regional variations in demand and tailor marketing strategies accordingly.
- **Marketing Strategy:** Develop a targeted marketing strategy based on potential seasonality and regional demand.
- **Customer Journey Optimization:** Streamline the customer journey to reduce the average time spent in the funnel

# • Conclusion

- This Analysis revealed opportunities for improvement in lead conversion rates and operational efficiency.
- Addressing issues in the Visited and Agreement stages, understanding regional demand, and optimizing marketing strategies can contribute to a more effective sales funnel.
- Reducing the average time spent in the funnel will enhance overall customer satisfaction.
- The recommendations aim to provide actionable insights for ongoing improvements and strategic planning.

# THANK YOU !
